Before you apply

- Lead with reliability as a number: “99%+ attendance across X years, zero unexcused absences.”
- Translate custodial work into operations terms: supply ordering and inventory, SDS/OSHA chemical safety, key and alarm control, finishing routes on deadline without supervision.
- For craft and bench roles, attach a simple portfolio: 5–10 well-lit photos of finished pieces.
- Read each ad's Physical Requirements section. “Lift 50 lbs” is often copied boilerplate on desk jobs; ask HR, and ask large employers for an elevator-accessible workstation.
- Apply first to hospitals, universities, school districts and government: steady benefits, internal promotion, and often tuition help for design, CAD or IT classes.
